

Option three: based on Beau Sia's "I'm so deep"
Author's note: This is a joke. I'm not this smart.

Im so smart...
Wisdom falls from my mouth like a waterfall
Trivial trivia and lively life lessons pour from me indiscriminately

Im so smart, the boring library is my playground
In just one gram of my mind,
Absorbing facts like activated carbon,
is 2 tennis courts of surface area for knowledge to hide
(just look it up cuz I think I'm being timed.)

Im so smart, when I say something slowly... It just makes me sound thoughtful...
And When my sentences trail off you understand my.....
Im so smart, when i gaze off into space... everyone thinks I've just thought of
something profound

Im so smart, the corridors of my mind are 4 dimensional
And yet no one gets lost in them
Cuz there is a light and I show it to them

Im so smart, I dont care if antidisestablishmentarianistic isn't "common" usage,
If it makes sense im gunna use it!
Im so smart if you have hippopoto monstro sesquippe dalio phobia you better start
runnin.
And and I'm a lil cubby cuz 3.14159265 isnt enough pi for me

Im so smart, I quote Abraham Lincoln and Einstein like they're my own words
And I live by 'remain silent and be thought a fool, or speak and remove all doubt'
Because a closed mouth gathers no foot
like a rolling stone gathers no moss.

And if someone asks me for an answer,...
I give it to them just because I know
Im so smart, I whisper not because of Mr. Randon over my shoulder
I only whisper cuz I want you to listen,

And ill feed you the meaning, baby birds, til you need to fly,
then you need to spread your wings all on your own, and reach for the sky
... Thoughtfully, because not knowing the answer isn't the end
It is the beginning.

David Bubernick

I tried to write it as close to what I was
